

# Microsoft Teams For WHMCS

 [Here you can buy the module](#)

## Description

This module complements the WHMCS notification system to send messages via Microsoft Teams. The module is fully integrated into the WHMCS notification system so that all functions can be used.

The screenshot shows a Microsoft Teams chat window titled "Deploymentcode > General ...". The chat contains two messages from "WHMCS" at 1:38 AM. Each message is a notification for an invoice payment, including details like Client, Due Date, Total, Payment Method, and Status. The messages include a "Reply" button and a "Start a new conversation" prompt at the bottom.

Deploymentcode > General ...

**For each configured notification, the following additional options can be set:**

- Message Color
- Replace the default webhook URL with a custom webhook URL to post messages in different channels
- Customize the primary display message shown in the notification
