

Add NOC-PS Server

Add your NOC-PS Installation into WHMCS.

1. Go to the WHMCS Admin backend and click **Setup Products/Services Servers**.
2. Create a new group if you plan to use multiple NOC-PS installations, or click **Add New Server**
3. Fill out the fields. For "Name" you can enter anything you wish. "Hostname" is the URL for your NOC-PS installation. "Type" should be "Dedicated Server". Enter your NOC-PS login in the "Username" and "Password" fields.

This screenshot shows an example configuration screen:

Name	<input type="text" value="Dedicated Server"/>
Hostname	<input type="text" value="noc-ps.deploymentcode.co"/>
IP Address	<input type="text"/>
Assigned IP Addresses (One per line)	<input type="text"/>
