Microsoft Teams Configuration

To use the module, you need to create a new Incoming Webhook:

- Open the App Store at teams.microsoft.com

- Search for "Incoming Webhook"
 Select a Team and click on "Install"
 Select a channel and click on "Set Up"
- On the next step, provide a name and click on "Create"
 Save the URL and copy it into the notification module at WHMCS

The steps are demonstrated in following video:
