

# Microsoft Teams Configuration

To use the module, you need to create a new Incoming Webhook:

- Open the App Store at [teams.microsoft.com](https://teams.microsoft.com)
- Search for **"Incoming Webhook"**
- Select a Team and click on **"Install"**
- Select a channel and click on **"Set Up"**
- On the next step, provide a name and click on **"Create"**
- Save the URL and copy it into the notification module at WHMCS

The steps are demonstrated in following video:
