

Release Notes

Version 1.5.0

Released: 22.09.2022

Type	Information
Feature	Added support for WHMCS 8.6 & PHP 8.1

Version 1.4.4

Released: 19.06.2022

Type	Information
Feature	Added support for SRV DNS records.
Feature	Added support for CAA DNS records.
Note	Added "customdns.example.php" to demonstrate how to programmatically set DNS records depending on the users hosting packages.
Improvement	Various stability improvements.

Version 1.4.3

Released: 12.08.2021

Type	Information
Improvement	The WHMCS IRTP integration has been improved, so that now also in case of an owner change after a whois update a notice appears in the WHMCS client area, if the IRTP validation has not been completed yet.

Version 1.4.2

Released: 25.06.2021

Type	Information
Bugfix	In some WHMCS versions the conversion of the IDN domain did not work correctly during domain synchronization, because WHMCS does not pass the domainObj array. The module now creates the required array itself if necessary.

Version 1.4.1

Released: 21.04.2021

Type	Information
Bugfix	Fixed an error at the WHMCS Registrar & Price Sync function
Improvement	The "Test Synchronization" now shows a detailed calculation path so it is more understandable how the expiration date is calculated.

Version 1.4.0

Released: 22.12.2020

Type	Information
Improvement	Improved IDN domain support. idn_to_ascii() is no longer required.

Feature	Added option: " Hidden Lock Status TLDs " to suppress registrar lock warnings at the client area.
Feature	Added option: "Default TTL Value" - If "Create DNS Zone" option is enabled, its now possible to set the default TTL value of the default DNS records.
Feature	WHMCS v8.1 support

Version 1.3.0

Released: 30.06.2020

Type	Information
Feature	Added option at the registrar settings to automatically create a DNS zone to meet the DENIC requirements
Feature	PHP function to override the DNS zone records

Version 1.2.1

Released: 29.05.2020

Type	Information
Feature	All module calls are now logged into the WHMCS module debug log

Version 1.2.0

Released: 24.05.2020

Type	Information
Feature	If a transfer failed, the reason is now returned
Feature	Integration of Domain Contact Verification
Feature	Integration of Registrar TLD & Pricing Sync
Feature	If a new module version is available, a note appears in the WHMCS registrar settings.
Improvement	WHMCSBot is now optional

Version 1.1.5

Released: 05.12.2019

Type	Information
Improvement	Better detection of the telephone format when changing the contact details
Feature	WHMCS v7.9 compatibility

Version 1.1.4

Released: 09.04.2019
