

# Install the module

The API credentials are the same login data as for your Rocket.Chat user account.

The installation and configuration of the module should take no longer than 5 minutes. Follow these simple steps:

1. Extract the module archive which you downloaded from the client area.
2. Upload the module to your WHMCS installation.
3. Go to the WHMCS Admin backend, click on **Setup Notifications**.
4. At "Rocket.chat" click on **Configure** and enter the required details.

After completing these steps, the module setup is complete and you can proceed with configuring the notifications.

Configure Rocketchat

Rocket.chat URL

https://rocket.deploymentcode.com

URL to your rocket.chat installation. Example: https://rocket.mydomain.com

Rocket.chat API Username

andreas

Enter a rocket.chat username.
