

Release Notes

Version 1.2.0

Released: 21.09.2022

Type	Information
Info	This release contains template changes. If you adjusted the module's client area template, be sure to update your template.
Feature	Added support for WHMCS 8.6 & PHP 8.1
Feature	Added support for username & password custom fields

Version 1.1.1

Released: 05.09.2021

Type	Information
Information	This update contains template changes
Feature	Now it is possible to show the hostname of TrueNAS / FreeNAS instead of the IP at the WHMCS client area

Version 1.1.0

Released: 02.08.2021

Type	Information
Breaking change	If you use our API class in your own PHP code, please make sure you are using the new API class as outlined here .
Feature	Support for TrueNAS has been added.
Improvement	Various minor optimizations have been made to the code, which improves the performance of the module in certain setups. Furthermore, additional verification checks have been implemented. For example, when terminating an account, the module now verifies that the dataset was successfully deleted (regardless of whether the API reports success, in order to detect rare dataset locks).
Bugfix	If iSCSI was automatically enabled when new accounts were created, the default IP whitelist for iSCSI was ignored.
Bugfix	Under certain circumstances, an incorrect SSH shell was displayed when editing ACL groups.

Version 1.0.7

Released: 31.12.2020

Type	Information
Info	This update contains template changes
Feature	Added compatibility for WHMCS v8.1 and Bootstrap 4
