

Install the module

The installation and configuration of the module should take no longer than 5 minutes. Follow these simple steps:

1. Extract the module archive which you downloaded from the client area.
2. Upload the module to your WHMCS installation.
3. Go to the WHMCS Admin backend, click on **Setup Notifications**.
4. At "Jabber" click on **Configure** and enter the Jabber server details and license key.

After completing these steps, the module setup is complete and you can proceed with configuring the notifications.

Configure Jabber

Jabber Server

jabber.internal

Address to your Jabber server. Example: xmpp.yourdomain.com

Jabber Port

5222

Port of your Jabber server. Default: 5222

Disable SSL?

☐ This option allows you to establish the connection without encryption.

Jabber Username

whmcs

Enter the Jabber username from which the notifications are sent.

Jabber Password

Enter the appropriate password for the user account.

Default Receivers

dev@jabber.internal

Enter the usernames to which the messages are sent by default. Seperate by whitespace for multiple receivers. Can be overwritten per notification.

License Key

dplxmpp_fcb52c1bax

Enter your license key from Deploymentcode.

Disable
