Install the Module

(i)

Installation of this module is done in 2 easy steps.

Activate the SEPA Module

The module works in conjunction with the gateway. You can see the recent collected invoices or collectable invoices over the module page.

- 1. Extract the module archive which you downloaded from the client area.
- 2. Upload the module to your WHMCS installation.
- 3. Go to the WHMCS Admin backend, click on Setup Addon Modules and click "Activate" at the SEPA Module.
- 4. Click on **Configure**, enter your license key. At Access Control select "Full Administrator".

Next activate the SEPA Gateway.

- 1. Click on Setup Payments Payment Gateways. Then click on "All Payment Gateways" and enable "SEPA.NET".
- 2. Click on "Manage Existing Gateways" and configurate the module. The individual options are explained below.

| Show on Order Form Image: Control of Contr | Success! The changes to the payment gateways settings have been saved | | | |
