

# Module Installation

 Installation of the module is completed within minutes.

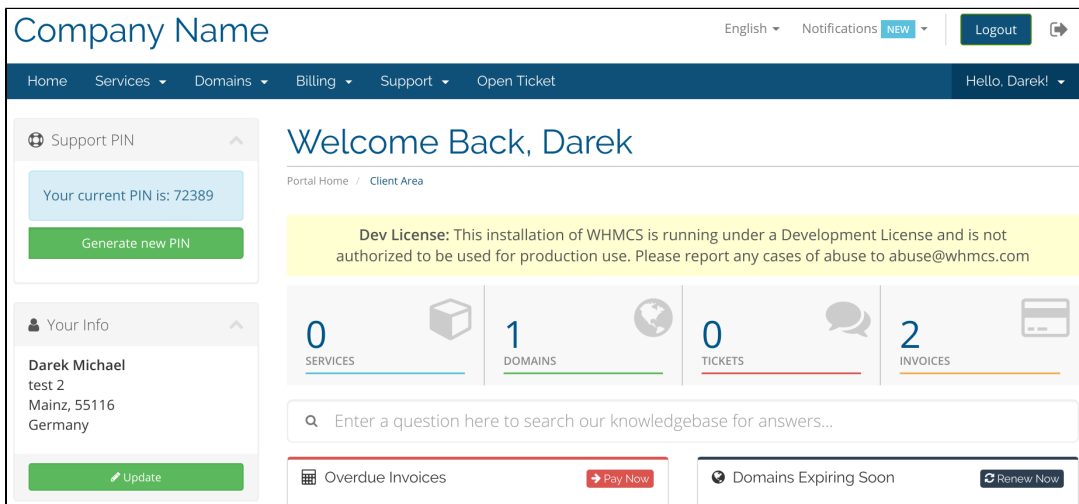

1. Extract the module archive which you downloaded from the client area.
2. Upload the module to your WHMCS installation.
3. Go to the WHMCS Admin backend, click on **Setup Addon Modules** and activate the module.
4. Click on **Configure** and do configure the values which you want to edit or leave it at the default values. At the point "Full Access IDs" you can specify which Admins should have access to all generated PINs. Accounts which are not listed will have to use the search mask to lookup the pin. Admins must be specified by their ID.
5. At "Access Control" select "Full Administrator".

If you want to use the dedicated module page, which is available under <https://yourdomain.com/index.php?m=supportpin>, you need to add a menu entry. An example hook to add the menu entry is included in the module package.

On WHMCS v6 or above a [sidebar widget](#) is available, therefore you do not need to add a link to the module page. At the module configuration you choose via a dropdown between 2 different sidebar themes:

The screenshot shows the WHMCS Client Area interface. The top navigation bar includes links for Home, Services, Domains, Billing, Support, and Open Ticket. The main content area features a 'Welcome Back, WHMCS' message and a dashboard with statistics: 2 SERVICES, 0 DOMAINS, 0 TICKETS, and 0 INVOICES. A search bar is present for the knowledgebase. The left sidebar, titled 'Support PIN', displays a PIN input field with the digits 7, 4, 6, 0, 3 and an 'Update' button. Below this, the 'Your Info' section shows the user's name and address, and the 'Contacts' section indicates no contacts found.

The screenshot shows the WHMCS Client Area interface with a different sidebar theme. The top navigation bar is identical. The main content area features a 'Welcome Back, Darek' message and a dashboard with statistics: 0 SERVICES, 1 DOMAINS, 0 TICKETS, and 2 INVOICES. A search bar is present for the knowledgebase. The left sidebar, titled 'Company Name', displays the user's name and address, and a 'Generate new PIN' button. Below this, the 'Overdue Invoices' and 'Domains Expiring Soon' sections are visible.
