

# Features

The configuration possibilities result in many useful features:

- Bonus can be shown during order process (optional).
- After payment, client gets a mail which confirms that the next due date got updated (optional).
- Apply bonus for monthly, quarterly, semi-annually, annually, biennially and triennially payments.
- Apply minus days, e.g. minus 2 days on monthly payment.
- Apply bonus in form of date calculations, e.g. "+3 m -1 d" (= Plus 3 month, minus 1 day)
- Apply whole WHMCS Product Groups for the bonus.
- Exclude single WHMCS Product IDs from the allowed groups.
- Configure bonus for single WHMCS Product IDs.
- Bonus can be defined in days and months.
- Exclude Client Product IDs from bonus.
- Exclude Clients from bonus.
- Define a date from which order date the bonus should be active (allows you to apply the bonus only for new orders).
- Multilanguage (Order process, Mails).

Next Due Bonus

Exclude WHMCS Product ID

You can specify a Product ID which is in an allowed group, but should be excluded from extensions.

Add

WHMCS Product ID	Delete
Webpace Promotion (ID: 1)	Delete

Allow WHMCS Group ID

Specify a Product Group which should get free extensions according to the default configuration.

Add

WHMCS Product Group ID	Delete
Webpace (ID: 1)	Delete
Xen Hosting (ID: 2)	Delete

Exclude Client ID

You can exclude specific customers from getting free extensions. Useful for business customers which should not get free run time.

Add

Client ID	Delete
Derek Michael (ID: 2)	Delete

Exclude Client PID

Client PIDs listed here will get free extensions but you can exclude some specific services. Useful if you have a custom services for a customer.

Add

Product	Delete
forempsaum.com (ID: 2)	Delete

Default Configuration

This is the global configuration. The product group added at 'Allow WHMCS Group ID' will receive these free extensions. Click into the field 'Value' to edit. Values must end with 'd' for days or 'm' for months.

Billing Cycle	Value
Monthly	Set
Quarterly	Set
Semi-Annually	Set
Annually	1 m
Biennially	2 m
Triennially	3 m

Special Product Configuration

You can give certain product ids an individual extension. This is useful for promotions. If you delete the entry later, it will fall back to the default configuration.
