

Orderform Template Changes

If you would like the customer to see the bonus offer during the ordering process, you can make the following changes to the order form:

1. Open "/templates/orderforms/your_order_form/configureproduct.tpl"
2. Find the pricing output. Pricing output begins at "\$pricing.monthly"
3. Change the following:

Change From	Change To
"{\$pricing.monthly}"	"{\$pricing.monthly} {if \$ExtendDuration.Monthly}+ {\$ExtendDuration.Monthly} {/if}"
"{\$pricing.quarterly}"	"{\$pricing.quarterly} {if \$ExtendDuration.Quarterly}+ {\$ExtendDuration.Quarterly} {/if}"
"{\$pricing.semiannually}"	"{\$pricing.semiannually} {if \$ExtendDuration.SemiAnnually}+ {\$ExtendDuration.SemiAnnually} {/if}"
"{\$pricing.annually}"	"{\$pricing.annually} {if \$ExtendDuration.Annually}+ {\$ExtendDuration.Annually} {/if}"
"{\$pricing.biennially}"	"{\$pricing.biennially} {if \$ExtendDuration.Biennially}+ {\$ExtendDuration.Biennially} {/if}"
"{\$pricing.triennially}"	"{\$pricing.triennially} {if \$ExtendDuration.Triennially}+ {\$ExtendDuration.Triennially} {/if}"

The template file should look like that:

```
{if $pricing.monthly}
  <option value="monthly"{if $billingcycle eq "monthly"} selected{/if}>
    {$pricing.monthly} {if $ExtendDuration.Monthly}+ {$ExtendDuration.Monthly} {/if}
  </option>
{/if}
{if $pricing.quarterly}
  <option value="quarterly"{if $billingcycle eq "quarterly"} selected{/if}>
    {$pricing.quarterly} {if $ExtendDuration.Quarterly}+ {$ExtendDuration.Quarterly} {/if}
  </option>
{/if}
{if $pricing.semiannually}
  <option value="semiannually"{if $billingcycle eq "semiannually"} selected{/if}>
    {$pricing.semiannually} {if $ExtendDuration.SemiAnnually}+ {$ExtendDuration.SemiAnnually} {/if}
  </option>
{/if}
{if $pricing.annually}
  <option value="annually"{if $billingcycle eq "annually"} selected{/if}>
    {$pricing.annually} {if $ExtendDuration.Annually}+ {$ExtendDuration.Annually} {/if}
  </option>
{/if}
{if $pricing.biennially}
  <option value="biennially"{if $billingcycle eq "biennially"} selected{/if}>
    {$pricing.biennially} {if $ExtendDuration.Biennially}+ {$ExtendDuration.Biennially} {/if}
  </option>
{/if}
{if $pricing.triennially}
  <option value="triennially"{if $billingcycle eq "triennially"} selected{/if}>
    {$pricing.triennially} {if $ExtendDuration.Triennially}+ {$ExtendDuration.Triennially} {/if}
  </option>
{/if}
```
