

Configure the Module

Go to your WHMCS Admin Area and click **Addons Slack for WHMCS**.
Now you see 2 boxes which tell you the next 2 steps.

Slack for WHMCS

Setup new Endpoint

Manage #Channels

API Usage Informations

Setup Step 1

Click here to setup Endpoints. Endpoints are the events where the slack message will get posted.

Setup Step 2

Click here to configure the Slack Channel which should receive notifications.

| Endpoint | Channels | Message | Actions |
|---|----------|---------|---------|
| You have not added any endpoint. Begin with the setup | | | |
