

Configure Products

Create a new product or edit the existing server product. Click on **Module Settings** and choose **Dedicated Server** at Module Name. After choosing the module, additional configuration fields will be loaded, which are explained below.

Auto Setup

Select "Automatically setup the product as soon as the first payment is received" if deployments should be processed automatically.

Dedicated Server Products

If the product is a dedicated server, choose **Dedicated** at the option Server Type.

Details	Pricing	Module Settings	Custom Fields	Configurable Options	Upgrades	Free Domain	Other	Links
Module Name		Dedicated Server				Server Group		
Server Type		Dedicated				Choose if product is a dedicated server or VPS.		

Virtual Server (VPS) Products

If this product is a virtual server (VPS), choose **VPS** at the option Server Type and click **Save Changes**.

After saving, a new field will appear which shows your hostsystems. Select the hostsytem on which you want to auto setup the VPS products and click **Save Changes** again.

New configuration options will be shown which allows you to set the ressources of this product.

The following options can be setted:

- Diskspace
- Memory (RAM)
- CPU Cores
- Network interface (vibr0, etc.)
- Datastore

Module Settings	Custom Fields	Configurable Options	Upgrades	Free Domain	Other	Links		
Module Name		Dedicated Server				Server Group		ded
Server Type		VPS				Hostsystem		proxmox-test1 (10.20.43.85)
Disk Space		1000				Memory		2000
CPU Cores		4				Network		vibr0
Datastore		test-3						

At the IP Manager you can assign the subnets to your hostsystems.
