

Module Installation

Upload the module into your WHMCS directory and then activate the module:

1. Download the module archive from the [client area](#) and extract it.
2. Upload the module to your WHMCS installation.
3. Go to the WHMCS Admin backend, click on **Setup Addon Modules**.
4. Click **Activate** at **Extended Domain Reminder**.
5. Click **Configure**, enter your License Key and select **Full Administrator** at Access Control.

After [configuring the module](#) disable the default WHMCS reminder mails by navigating to **Setup Automation Settings**. Make sure that you enabled the "[Production Mode](#)" at the module settings.
