» Auto Login from Mails		1.1	Deploymentcode.com
Let your clients login automatically from mails.		Activate	Deactivate
Configure			

License Key

autologin-c895c94b9e

Key from deploymentcode.com

Auth Link is valid for

24

hours

Maxmium Page Views

The client will be logged out automatically if the defined amount of page views is reached.
This function could be used to allow only viewing the current page (e.g. invoice or ticket feedback page). **Default:** blank

First URL Token Parameter

lauto

With this option you can change the first token parameter which will be used in the auto login mail. **Default:** lauto

Second URL Token Parameter

lauth

With this option you can change the second token parameter which will be used in the auto login mail. **Default:** lauth

Expire all other links on click

☐

If enabled, all other auto-login links from the client will expire if he opens a auto login link.

Expire all links on password change

☒

Expire all auto-login links if client changes his password

Expire all links on mail change

☒

Expire all auto-login links if client changes his mail address

2 Factor Authentication

☒

When enabling this option, clients with enabled 2 factor authentication must login normally.

Alert Boxes via Javascript

☒

A alert box on the login page will appear if the Autologin Link is not valid or the maximum page view value is reached.
You can modify the output by editing the file template.php
If you do not want to use the Javascript mode, you can modify your template by hand or do not display any alert box. Please refer to the module docs for more informations.

Enable Opt-Out / Opt-In

☒

With this option your clients can opt-out or opt-in from auto login by mail.

Opt-In / Opt-Out Field

Opt-out from Autologin by Mail

Your clients can Opt-In or Opt-Out from receiving working auto-login links.
Some customers may do not want to bypass the password login.
Deactive "Enable Opt-Out / Opt-In" to disable.

Client must Opt-in

☐

Enable this option if the clients should explicit opt-in for auto login.
If this option is not enabled: The clients can opt-out by check mark your custom field.
If this option is enabled: The clients must check mark your custom field for auto login from mails.
