

Template Changes (optional)

The module does create additional smarty variables which can be useful to show informations to your clients.
All Template changes are optional.

Domain Configuration Page

In order to inform the customer immediately during the ordering process that he can activate additional domains in the product detail page, the following information can be displayed.

To show this informations, you need to add the following code into the file `/templates/orderforms/standard_cart/configureproductdomain.tpl` . Replace "standard_cart" with your shopping cart template.

```
{if $AdditionalFreeDomainsPossible}
    <div class='alert alert-success'>{$AdditionalFreeDomainsPossible}</div>
{/if}
```

The file should look like here:

```
22         <div class="col-md-9 pull-md-right">
23
24             {include file="orderforms/standard_cart/sidebar-categories-collapsed.tpl"}
25
26             {if $AdditionalFreeDomainsPossible}
27                 <div class='alert alert-success'>{$AdditionalFreeDomainsPossible}</div>
28             {/if}
29             |
30         <form id="frmProductDomain">
```

The information will be only shown if the product has free domains.
You can edit the text in the module language file.

Show amount of free domains per billing cycle

The amount of free domains per billing cycle can be shown during ordering

Configure

Configure your desired options and continue to checkout.

Package 1

Choose Billing Cycle

- \$3.99 USD Monthly + \$3.99 USD Setup Fee
- \$3.99 USD Monthly + \$3.99 USD Setup Fee**
- \$5.99 USD Quarterly
- \$8.00 USD Semi-Annually (5 Free Domain)
- \$9.00 USD Annually (6 Free Domain)
- \$12.00 USD Biennially (7 Free Domain)
- \$14.00 USD Triennially (8 Free Domain)

Open the file `/templates/orderforms/standard_cart/configureproduct.tpl` and search for the payment cycle output. It begins on line 55. Replace "`{pricing.monthly}`" with "`{pricing.monthly|replace:'{$FreeDomainsString':'{$AmountFreeDomains.monthly} $FreeDomainsString'}`" and continue replacing for all other payment cycles.

The result should be as following:

Change From	Change To
" {pricing.monthly} "	replace:"{\$FreeDomainsString}":"{\$AmountFreeDomains.monthly} \$FreeDomainsString")"
" {pricing.quarterly} "	replace:"{\$FreeDomainsString}":"{\$AmountFreeDomains.quarterly} \$FreeDomainsString")"
" {pricing.semiannually} "	replace:"{\$FreeDomainsString}":"{\$AmountFreeDomains.semiannually} \$FreeDomainsString")"
" {pricing.annually} "	replace:"{\$FreeDomainsString}":"{\$AmountFreeDomains.annually} \$FreeDomainsString")"
" {pricing.biennially} "	replace:"{\$FreeDomainsString}":"{\$AmountFreeDomains.biennially} \$FreeDomainsString")"
" {pricing.triennially} "	replace:"{\$FreeDomainsString}":"{\$AmountFreeDomains.triennially} \$FreeDomainsString")"

The billing cycle text will be only adjusted, if free domains are available.
You can modify the text at the language file.

Cancellation Request Page

When a client want to cancel his product, you can show additional informations about his free domains.
If the product has free domains, the smarty variable "FreeDomains" is available. This variable contains an array with all domain IDs and domain names related to this product.

Account Cancellation Request

[Portal Home](#) / [Client Area](#) / [My Products & Services](#) / [Product Details](#) / [Account Cancellation Request](#)

Requesting Cancellation for: **Hosting - Advanced** (mydomain.com)

Briefly describe your reason for Cancellation

Information about your free Domains

The following domains gets automatically deleted 30 days after the end of the hosting contract.

- freedomain1.com
- freedomain2.com
- freedomain3.com

You can take over the domains for the regular renewal price. Please contact our support team for this.

Request Cancellation

Cancel

Here is the code of our example. The code must be added into `/templates/six/clientareacancelrequest.tpl` . Adjust it how you need.

```
{if $FreeDomains}
  <div class="panel panel-warning">
    <div class="panel-heading">
      <h3 class="panel-title">{$LANG.cancel_hosting_inclusivdomains_head}</h3>
    </div>
    <div class="panel-body">
      <p>{$LANG.cancel_hosting_inclusivdomains_desc1}</p>
      <ul>
        {foreach item=domains from=$FreeDomains}
          <li><a href="clientarea.php?action=domaindetails&id={$domains.domainid}" target="_blank">
{$domains.domain}</a></li>
        {/foreach}
      </ul>
      <p>{$LANG.cancel_hosting_inclusivdomains_desc2}</p>
    </div>
  </div>
{/if}
```
