

# Install the module

The installation and configuration of the module should take no longer than 5 minutes. Follow these simple steps:

1. Extract the module archive which you downloaded from the client area.
2. Rename the file `"/modules/servers/servicenotifications/license_rename.php"` into `/modules/servers/servicenotifications/license.php` and insert your license key.
3. Upload the module to your WHMCS installation.
4. Now you can assign the module to a product.

**License key configuration**
