

Install the module

The installation and configuration of the module should take no longer than 5 minutes. Follow these simple steps:

1. Extract the module archive which you downloaded from the client area.
2. Upload the module to your WHMCS installation.
3. Go to the WHMCS Admin backend, click on **Setup Notifications**.
4. At "Flock" click on **Configure** and enter the required details.

After completing these steps, the module setup is complete and you can proceed with configuring the notifications.

To send the notifications, you have to create a webhook in the module. You can create the webhook under <https://dev.flock.com/webhooks>
