

Admin product page: Custom Buttons

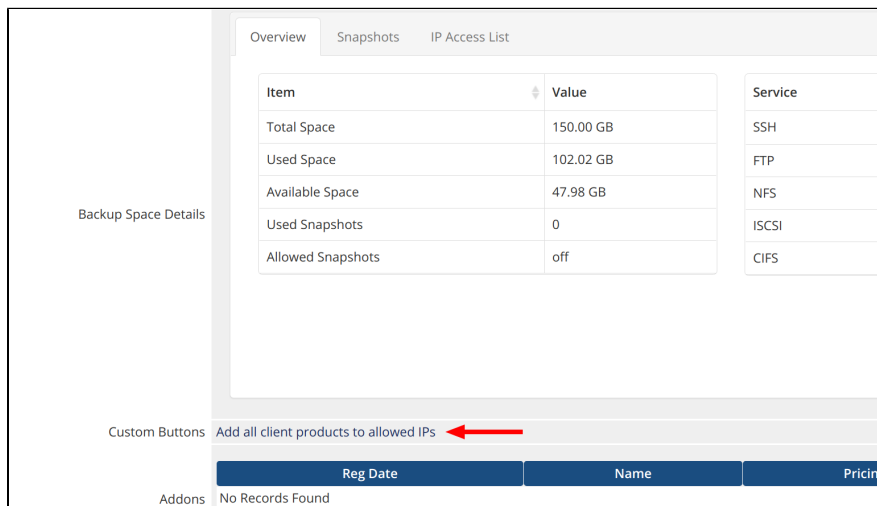

Custom output can be added to the admin product view to expand the system. To add a custom button to the product, please proceed as follows:

1. Open the directory "/modules/servers/freenas".
2. Create the file customconfig.php, or open the file, if it already exist.
3. Insert following code:

```
<?php

if (!function_exists('freenas_customButtons')) {
    function freenas_customButtons ($params) {
        return "<a href='clientservices.php?id={$params['serviceid']}'&do=doSomething'>Do Something</a>";
    }
}
```

Using the [publicly available API class](#), you can add your own functions to the module, the result would be as example:

The screenshot displays the Freenas Admin interface. On the left, there is a sidebar with 'Backup Space Details' and 'Custom Buttons'. The main content area has tabs for 'Overview', 'Snapshots', and 'IP Access List'. Under 'Overview', there are two tables. The first table, 'Backup Space Details', has columns 'Item' and 'Value'. The second table, 'Services', has columns 'Service' and 'Value'. The 'Custom Buttons' section at the bottom contains a button labeled 'Add all client products to allowed IPs', which is highlighted with a red arrow. Below this, there is a table with columns 'Reg Date', 'Name', and 'Pricing', and a message 'No Records Found'.

Item	Value
Total Space	150.00 GB
Used Space	102.02 GB
Available Space	47.98 GB
Used Snapshots	0
Allowed Snapshots	off

Service	Value
SSH	
FTP	
NFS	
ISCSI	
CIFS	

Custom Buttons: Add all client products to allowed IPs

Reg Date	Name	Pricing
No Records Found		

You can handle GET or POST requests inside of the customconfig.php, e.g.:

```
<?php

if ($_GET['do'] === 'doSomething' AND !empty($_SESSION['adminid'])) {
    // do something
}

if (!function_exists('freenas_customButtons')) {
    function freenas_customButtons ($params) {
        return "<a href='clientservices.php?id={$params['serviceid']}'&do=doSomething'>Do Something</a>";
    }
}
```
