

# Description of Options

**Auth Link is valid for:** The Auto Login Link will expire after the given time in hours.

**Maximum Page Views:** You can limit the amount of page views. This option make it possible to only view the invoice and do not make other changes. Or to leave a ticket feedback, but do not permit to make more requests.

**First URL Token Parameter:** You can change the GET parameter name.

With this option you can change the name of the URL. E.g.: <https://my-whmcs.com/clientarea.php?MyCustomToken=....&MyCustomToken2=....>

**Second URL Token Parameter:** Same as above

**Expire all other links on click:** When client opens a Auto Login Link, all other links for this client will expire.

**Expire all links on password change:** If the client changes his password, the Auto Login Links will expire.

**Expire all links on mail change:** If the client changes his mail address, the Auto Login Links will expire.

**Dont expire link on click:** By default, the login link expires after using once. Enable this option to allow multiple logins using the same login link.

**2 Factor Authentication:** If the client uses 2 factor authentication, you can force him to login regularly. Otherwise, the 2 factor authentication is skipped.

**Alert Boxes via Javascript:** [Description](#)

**Enable Opt-Out / Opt-In:** Enable this option if you want to allow your clients to Opt-Out from Auto Login. The Auto Login Link will not log them in.

**Opt-In / Opt-Out Field:** To use the Opt-In / Opt-Out option, you need to create a new Tick Box custom field for clients. After that select the created field [here](#).

**Client must Opt-In:** Choose this option if you want that clients must explicit enable the Auto Login Checkbox (your created custom field, which can be found at the client profile page).
