

Product Descriptions for Clients For WHMCS

Here you can buy the module

Description

This module allows your customers to add descriptions to products and domains for easier identification. Optimal for customers with many products or for resellers.

The descriptions can also be added to the invoices.

The installation is easy and no changes are needed in your WHMCS template. The module adds the descriptions automatically.

The screenshot shows the 'My Products & Services' page in WHMCS. It features a table with columns for Product/Service, Price, Next Due Date, and Status. Several products are listed, including 'cPanel/WHM 1', 'Linux Hosting', 'VPS Hosting', and 'Dedicated Server'. Each product has a description field that has been populated with text like 'cPanel/WHM 1: 10 GB RAM - 24 480 GB SSD' and 'Linux Hosting: 10 GB RAM - 24 480 GB SSD'. The status of each product is indicated by a colored dot and a label (e.g., 'Active', 'Pending', 'Expired').

This screenshot shows a portion of the product list from the previous screenshot, focusing on 'Intel Xeon ES' products. It shows two rows: 'Intel Xeon ES - 32 GB RAM - 24 480 GB SSD' and 'Intel Xeon ES - 32 GB RAM - 24 480 GB SSD'. Both have descriptions added, such as 'Website: deploymentcode.com' and 'Website: deploymentcode.com'. The prices are listed as '\$5.00 USD' and '\$1.00 USD' respectively.

The screenshot shows the 'Insert Description for Client' dialog box. It has a text input field for the description, a 'Send' button, and a 'Cancel' button. Below the dialog box, there is a section titled 'Product Descriptions for Clients' which contains a table with columns for Product/Service, Price, Next Due Date, and Status. This table is similar to the one in the first screenshot, showing a list of products with their descriptions and status.
