

# Usage

The module offers various setting options, which are described below:

## License Key

Enter the license key from deploymentcode.

## QR code size

The size of the QR code in pixel. Default: 150

## Account Name

The name on which your bank account is registered.

## Your IBAN

Your IBAN number.

## Your BIC

This field is optional. Usually, you do not require to provide your BIC number.

## Statement description

The statement description will appear on the bank statement. The following variables are available:

Variable	Information
\$invoiceid	Number of the invoice (if client pays multiple invoices, a list of invoice IDs will be inserted)
\$client_id	The due date of the invoice
\$first_name	First name of your client
\$last_name	Last name of your client
\$company	Company name of the client (if any)

## Bottom Text

Optionally this text will be shown under the QR code. You can use HTML to style the output. The bottom text supports the same variables as the statement description.
