

Troubleshooting

Issue: I can't receive messages

If the sending of a message fails, the cause is recorded in the Blesta logs. You can find the logs in Blesta at Tools > Logs > Messenger:

Issue: Notifications are not sent

First step: Make sure that notification templates are enabled

Check if you have enabled the notification template in the system settings:

Second step: Enable the individual notifications

The ticket notifications must be activated under Support > Staff for the respective staff member:

Edit Staff admin admin
