

Update Proxy

When a new version of the proxy is available, you will see a notice in the list of all proxy servers, as well as in the detail view of the respective proxy.

Performe update

To perform the update, open the detailed view of the proxy and press the "Redeploy" button.

Notes

- All previous settings, such as the assignment of ACL groups and the network configuration of the proxy, are retained.
- The proxy will be unusable for about 15 minutes during the update.
