Admin Invoice Notifications For WHMCS

> ⓘ **Here you can buy the module**

Description

As a provider, there are always cases where you need to check if certain invoices have been paid. Admin Invoice Notifications For WHMCS allows you to set notifications for invoices to be notified when they are paid (or not paid).
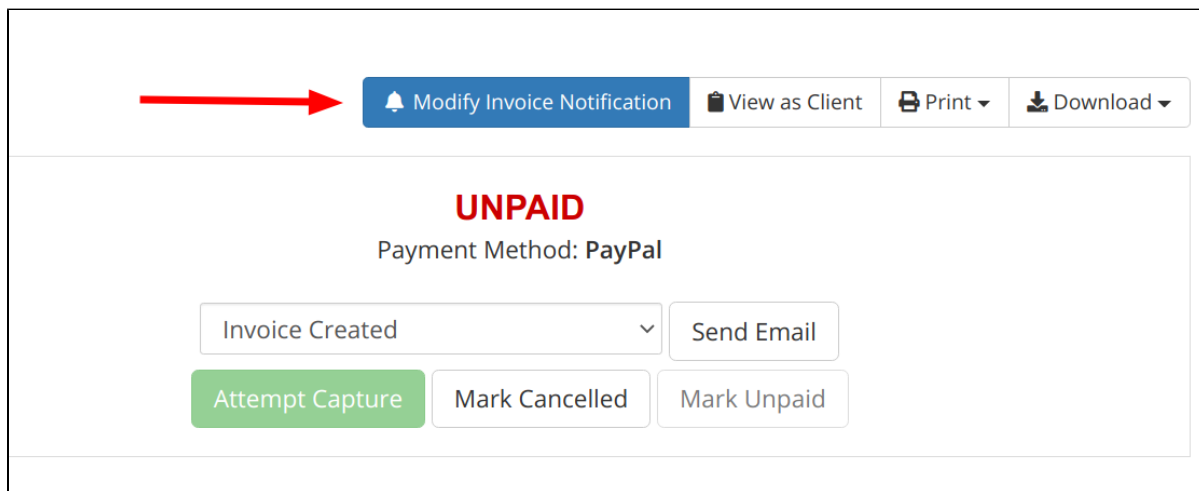

The notifications can be sent either via admin support ticket or via the WHMCS notification system. When creating a new notification you can add a text so that your team knows what to do.

Features

- Default values for ticket text, notification type, etc. can be configured in the module settings, so you can create new notifications without much effort.
- Notification upon payment.
- Notification upon non-payment. You can choose by when the invoice must be paid.
- Admin page for overview of all created notifications.
- Notification via admin support ticket or via the WHMCS notifications system.
