

Module Settings

In the module settings you can set the default values that should be pre-filled when you create a new notification. When creating a new notification you can edit all values as you like.

If the notifications are sent via an admin ticket, you need to fill in the "WHMCS Client ID" field. This is the client ID of a customer you have created yourself, this customer will be used to create the support ticket.

» Invoice Notifications

Customized admin notifications on unpaid / paid invoices.

1.0.0

License Key	XXXXXX	Key from deploymentcode.com
Default Trigger	On Payment	
Default Notification Method	Admin Ticket	
Default Support Department	General Enquiries
