Store ID	
Statement Description	Invoice #{{invoiceid}} - {{companyname}}
Sandbox mode	☑ Tick to enable sandbox mode.
Convert To For Processing	None ▾
	Save Changes

License Key

You will receive a license key from us, which you have to enter here.

Region

The region is set in your Amazon account. Because the API endpoints are different for each region, you need to select the region accordingly.

Public Key ID

The public key ID is displayed in your Amazon account.

RSA Private Key

The private key is provided by Amazon when you create a new API account. Open the file that Amazon offers you as a download when you create a new API key and copy the content into this field.

Store ID

The store ID is displayed in your Amazon account.

Statement Description

The value defined here will be displayed on the customer's account statement. Besides static text, the following variables are supported:

- {{invoiceid}}
- {{companyname}}

Sandbox mode

Enable this option if you want to test the module in the Amazon Sandbox.
