

# Install the module

**Installation of the module is completed within minutes.**

1. Extract the module archive which you downloaded from the client area.
2. Upload the module to your WHMCS installation.
3. Go to the WHMCS Admin backend, click on **Setup Addon Modules** and activate the module.
4. Click on "Configure" and enter your license key.
5. Set the option which meets your requirements.
6. At "Access Control" select nothing.

## Template Changes

**Template changes are only necessary if you do not use the 'Insert Cancel Code using Javascript' option!**  
If you have a custom theme, you may want to edit your template by yourself.

If you decide to not use the javascript mode, you must insert the template modification manually. At the module settings you can view the code which you must insert into your template.
