Volume Configuration

First, you need to create a new volume. The storage spaces are created on this volume. It is possible to create different volumes and store them in the WHMCS product configuration. but normally you only have one volume.

Create the volume

Navigate to **Storage View Volumes** and click the button **Volume Manager**.
Drag the slider to the maximum size and click **Add Volume**.

After creation it should look like on this screenshot.

Storage						

Volumes	Periodic Snapshot Tasks	Replication Tasks	Resilver Priority	Scrubs	Snapshots	VMware-Snapshot

Volume Manager	Import Disk	Import Volume	View Disks			

Name	Used	Available	Compression	Compression Ratio	Status	Readonly
◢ volume1	773.1 MiB (1%)	47.0 GiB	-	-	HEALTHY	
◢ volume1	772.5 MiB (1%)	45.5 GiB	lz4	1.06x	-	inherit (off)
